Alain MUCYO - Web & mobile developer

In 2018 when I was in secondary schools studying computer electronics, that's when I started designing and developing websites. After finishing my secondary schools that year, I started building production ready full stack web applications. From that I acquired project and time management skills, as well as the ability to communicate with team members and clients while effectively meeting milestones and deadlines.

I have worked on a multitude of web and print based projects for a range of clients providing Web Design (Figma), Development (PHP, HTML, CSS, SCSS, JS, jQuery, PHP, Laravel, Vue Js, Bootstrap, Responsive Layouts, SQL), database management system (MySQL, MongoDB), version controls (Github, Gitlab) and project management (Trello).
